PROFESSIONAL SUMMARY

XR/VR Developer and Technical Lead with 5+ years of experience designing and shipping immersive simulations for medical, pharmaceutical, and corporate training sectors. Proven expertise delivering multiplatform XR applications in Unity and Unreal Engine for European clients. Specialises in AI-integrated real-time 3D experiences, GPT-driven NPC systems, procedural scenario logic, and reusable modular XR frameworks.

CORE COMPETENCIES

XR / VR / AR Development, Medical XR Simulation, Unity (C#) and Unreal Engine 5, AI NPC Integration (GPT), Meta Quest 2/3 Deployment, Modular SDK Architecture, ElevenLabs Voice AI, Multiplatform iOS / Android / PC, Procedural Scenario Logic, Cinematic Animation, Real-Time 3D Simulation

PROFESSIONAL EXPERIENCE

Senior VR Developer

onVR | Dusseldorf / Remote | *January 2025 - Present*

- Leading a cross-functional development team on a multiplatform XR/Mobile component warehousing solution in Unity targeting Meta Quest, iOS, and Android simultaneously.
- Architecting a modular Unity Package Manager (UPM) system of reusable multi-platform components to accelerate delivery across client projects.
- Built a GDD - to - LLM – flow - controller graph pipeline that reads a Game Design Document, converts it to a flow graph and auto-wires a pre-built mechanics library, reducing time from concept to playable build from weeks to hours.

VR Developer

onliveline GmbH | Cologne / Remote | *May 2023 - January 2025*

- Led all programming on VR Medical Storytelling single-player applications, delivering patient education and HCP training tools for major pharmaceutical clients.
- Created in-engine cinematic animations using Unity Timeline and Blender for high-fidelity storytelling within real-time XR environments.
- Integrated ElevenLabs API for generative NPC voice acting inside VR, eliminating dependency on pre-recorded studio audio.
- Built photorealistic VR avatar NPCs using Ready Player Me SDK and Mixamo animation pipelines.
- Developed a GPT-powered 3D AI character with context-driven motion capture animation selection for adaptive real-time interactions.

XR Developer (Freelance)

Weltenmacher GmbH | Remote | *May 2022 - May 2023*

- Designed and built a first aid VR training application for the German market, featuring driving simulations, emergency call interactions, AI pedestrians, accident animations, and hands-on object manipulation.
- Implemented procedural, randomised scenario logic requiring users to respond according to certified first aid guidelines, enabling repeatable and measurable training outcomes.
- Optimised and ported PCVR application to Meta Quest 2, achieving standalone deployment without performance degradation.

Game Programmer and XR Consultant

Self-Employed | Pune / Remote | *February 2019 - January 2022*

- Developed gamified mobile applications for an NGO to teach modern fishery techniques to farmers across India, combining instructional design with interactive 3D environments.
- Provided consulting to local studios on rapid prototyping, game design, and economy balancing; prototyped Facebook Instant Games in Unity.

- Implemented Google Analytics backend instrumentation and optimised real-time performance for mid- and low-end Android devices.

Game Designer (Intern)

SUTD Gamelab | Singapore | *May 2017 - August 2017*

- Designed PvP combat levels for a multiplayer title showcased at Game Start Asia 2017; authored spec documentation for an in-game editor balancing tool.
- Shipped a full MVP product within a 12-week internship cycle.

EDUCATION

MA in Games Enterprise
University of South Wales, Cardiff, United Kingdom | September 2017 - September 2018

Game Design and Project Management
Rubika Supinfogame, Pune, India | September 2014 - March 2017

TECHNICAL SKILLS

Engines: Unity (C#), Unreal Engine 4/5
Platforms: Meta Quest 2/3, Android, iOS, PCVR, Standalone XR
Languages: C#, Unreal Blueprints
AI and APIs: OpenAI GPT API, ElevenLabs API, Ready Player Me SDK
3D and Animation: Blender 3D, Unity Timeline, Mixamo
DevOps: GitHub Actions CI/CD, Perforce, AWS, JIRA
Domain Skills: XR Simulation Design, Medical Storytelling, Training Scenario Logic, Modular SDK Architecture, Level Design, Economy Balancing

AWARDS AND RECOGNITION

- Winner, Student Game of the Year 2016 - Nasscom GDC (NGF Award) - Proximity
- Winner, Best Student Game India and International - FICCI BAF Awards 2017 - Tremor
- Nominated, Indie Prize Showcase - Casual Connect San Francisco 2016 - Proximity
- Nominated, Big Indie Pitch - Pocket Gamer Connect Helsinki 2017 - No Monkey Business
- Nominated, Taipei Game Show 2017 - Overpowered
